

A website for € 150 ... how do I do that??

1. Get a domain name and a hosting package from a hosting provider. There are many different providers but on average it will cost you a maximum of € 100 per year. You can also get it cheaper but make sure that your hosting provider supports WordPress.

I work with Hostnet. The steps you need to take if you decide to use them too are:

- Visit www.hostnet.nl
- Fill your name in 'domeinnaam registreren' and click on 'checken'.
- Find a good name. For applications your own name probably works best but this is different if you want to get a website for your business. Subsequently click on 'bestellen' and use your back button on your browser and go back to the previous page. Click on 'Webhosting info&bestellen' and click on 'Webhosting Pro'.
- You then have to make an account and pay.
- Hostnet will subsequently send you a few emails. Copy and paste the contents of these mails into a word document and call this document 'For Designwell'.

This procedure might vary depending on which hosting provider you'll be using but in general these steps are all more or less the same.

2. Take a decision on which site you like most ... jacquelineterhaar.nl or designwell.eu. The first is more suitable for when you are unemployed or are looking for a job, the second is more suitable if you are a freelancer and want to show examples or references. The Designwell site also allows for a tab module such as on the the [jacquelineterhaar](http://jacquelineterhaar.nl) site.

3. Find one large picture on one of the many free photo sites or find one in your own collection. Make sure the photo is at least 1200 pixels wide. Find 2 colors you like. Add the information to the Word document you created in step 1.

4. Make sure your paper resume is in order and up to date. If you want me to lay it out properly I'll charge you only a little extra but you can easily do it yourself with one of the many free templates (including the ones in Word).

5. Divide your CV in the different categories and divide it among the various tabs. Give each tab your own descriptive name or use the titles from my website as an example.

6. Write your texts. The cubes below state exactly how much text you can need.

For the jacquelineterhaar website:

| | |
|---|---|
|  | <p>Block 1 15-35 words</p> |
|  | <p>Block 3 4 x max. 75 words</p> |
|  | <p>Block 5 150-175 words</p> |
|  | <p>Block 7 contact details</p> |

| | |
|--|--|
|  | <p>Block 2 150-250 words</p> |
|  | <p>Block 4 20-25 words</p> |
|  | <p>Block 6 6 x ? words and pictures if you want</p> |

For the Designwell site:

| | |
|---|--|
|  | <p>Page 1 175-200 words</p> |
|  | <p>Page 3 275-300 words</p> |
|  | <p>Page 5 300-350 words</p> |
|  | <p>Page 7 5 x 75-85 words</p> |

| | |
|--|--|
|  | <p>Page 2 200-225 words</p> |
|  | <p>Page 4 250-300 words</p> |
|  | <p>Page 6 contact details</p> |

Copy and paste ALLE texts and titles in your Word document.

1. Find some nice photos of yourself and, if you have it, a logo. Find, if you wish, also logos of companies you have worked for, programs that you have done and/or skills you have. Look for inspiration on the jacquelineterhaar.nl site.
2. Consider what you would like to add to your website to show that you are different. This doesn't have to be done straight away but can also be later ... or not. Your site will already be special!
3. Email me all your collected photos, images and your Word document. Writing and collecting all of this should be possible in less than a day! I'll check what you have sent me and decide what else, if any, needs to be added. Once everything is complete I'll send you an invoice with a payment request.
4. Within 24 hours after I have received your payment you will have a website resembling jacquelineterhaar.nl or designwell.eu but with your specific appearance, skills, facts and your CV. I will take your own photos and text to make you a professional looking website!
5. Now you can use the link to this site to make yourself known as a job seeker through Social Media and cover letters. Think of Facebook (for a small amount per week, you can create an ad that is brought to the attention of employers and other decision makers) or LinkedIn. I can, if you wish, also advice on what strategies you can control.

A few comments:

A. Both sites were built in DIVI. The website will be delivered 'as is' so no further updates to the theme are included. The theme has 1 or 2 updates a year. You may decide to purchase the template itself or you may want to leave the updating to me. If you choose the latter I will charge you €25 per incident.

B. I deliver the website with a backup on my own computer. Once I'm finished you can always 'play' with your own website and try out the various modules add stuff you like. If however something goes wrong, you can always ask me to place back the original site. I will charge you €25 per incident. You can also ask me to remove the backup from my PC. In that case, I obviously cannot do more for you if something goes wrong.

C. Both sites are basic and you can change and adapt everything yourself. Did you find the job or assignment of your life? It's very easy to make your (still very personal) site totally different by replacing texts and graphics or have me doing this for you ... making it thus, for example, a site with information about your great love, your passion or your hobby. You can also cancel your hosting subscription and give back your domain name. It's all up to you!
